Trosifol® SentryGlas®

1550 Alberni in Vancouver, CA

Vancouver's newest landmark, the 1550 Alberni residential tower, stands as a striking expression of nature-inspired design. Conceived by Kengo Kuma, the 43-story building reflects his signature approach —blending architecture with its surroundings while honoring traditional Japanese aesthetics. Sculpted with curved concrete forms and refined detailing, the tower marks Kuma's first residential project in North America and brings a sense of tranquility to the city skyline.

At street level, a Japanese moss garden sits beneath sweeping arches, setting a calm and immersive tone. Inside, 188 residences are paired with thoughtfully curated amenities, including a wine tasting room, art gallery, music room, fitness center, retail space, restaurant, and pool. Laminated glass with SentryGlas® was used for the glass floors and vertical fins, while Trosifol® Clear PVB was selected for the canopy, supporting both performance and design clarity throughout the project.

Application

- Roofs & Overheads
- Facades & Curtain Walls

Interlayer

- SentryGlas®
- Trosifol® Clear

Laminator

- Glass 3 Enterprises Ltd.

Region

- USA + Canada

Architect

- KENGO KUMA & ASSOCIATES

Glazing Contractor

- Flynn Group of Companies
