Bioparque Ukumari , Colombia

Located just outside Pereira, Bioparque Ukumari is a large-scale natural park that opened on September 30, 2015. Spanning approximately 820,000 square meters and attracting nearly 300,000 visitors annually, it is one of Latin America's major ecological and tourism destinations. The complex includes a zoo, veterinary clinic, aquarium, nature and anthropological museums, interactive attractions, and outdoor activities. Its design is organized around a variety of habitats, including the Andean Forest, African Savanna, Amazon Rainforest, Caribbean, and Asian regions.

The park features a dedicated hippo habitat with a large underwater viewing area, including a 132,000-gallon observation tank. The viewing platform incorporates 55 mm thick laminated glass with SentryGlas®, providing the structural strength, safety, and clarity required for close-range observation.

This immersive environment enhances the visitor experience while supporting education around wildlife conservation and the importance of preserving natural ecosystems.

Application

- Security Glazing

Interlayer

- SentryGlas®

Laminator

- Vidplex Universal S.A.S

Region

- LASA

Architect

- Carlos Ivan Garcia

Glazing Contractor

- Vidplex Universal S.A.S
