Trosifol® SentryGlas®

Simose Art Museum in Japan

The Simose Art Museum, recipient of UNESCO's Prix Versailles as one of the "World's Most Beautiful Museums," is a compelling fusion of art, architecture, and nature, designed to integrate seamlessly with its surroundings while reflecting a strong commitment to innovation and environmental sensitivity.

Located along Japan's Seto Inland Sea, the museum is defined by a striking 180-meter-long mirrored glass façade. Utilizing SentryGlas® interlayers for enhanced strength and performance, the façade reflects the surrounding landscape, creating a dynamic relationship between the structure and its natural context.

A distinctive feature of the museum is its series of movable gallery spaces situated on floating barges, allowing the visitor experience to continuously evolve and reinforcing the project's emphasis on flexibility and immersion.
Complementing the museum, the Simose Art Garden Villas extend the architectural experience into the landscape, creating a cohesive environment where built form and nature exist in harmony.
